

**tecsis****a firm with over 80 years' experience**

As a manufacturer of sensors and measuring devices with a presence in the global markets for decades, we have become a dependable port of call for our customers. By 1997 we built up access to global markets and service structures under the umbrella of the VDO brand. On this basis and the trust established over decades we have set out since 2001 under our own name: tecsis.
